DETAILED ACTION

1. This Office Action is the answer to the Amendment filed on December 13, 2006, which paper has been placed of record in the file.
2. Claims 29-52 are pending in this application.

Response to Arguments/Amendment

3. Applicant's arguments with respect to claims 29-52 have been considered but are moot in view of new grounds of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 48-50 are rejected under 35 U.S.C. 112, first paragraph, because the best mode contemplated by the inventor has not been disclosed. Claims 48-50 recited a single means. A single means claim, i.e., where a means recitation does not appear in combination with another recited element of means, is subject to an undue breadth rejection under 35 U.S.C. 112, first paragraph. In re Hyatt, 708 F.2d 712, 714-715, 218 USPQ 195, 197 (Fed. Cir. 1983) (A single means claim which covered every conceivable means for achieving the stated purpose was held nonenabling for the scope of the claim because the specification disclosed at most only those means known to the inventor.).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 51 and 52 are rejected under 35 U.S.C. 102(e) as being anticipated by Dent et al (hereinafter Dent), U.S. Patent No. 6,128,603.

Regarding to claim 51, Dent discloses an electronic bill payment network, comprising:

transmitting a determined first amount of an available bill from a biller to a user (column 4, lines 50-60);

determining a revised amount of the available bill (column 10, line 40-column 11, line 42, the bill is constructed with appropriate controls that enable a consumer to dispute an item; the bill automatically adjusts the amount paid to reflect the disputed amount); and

transmitting the revised amount of the available bill and a selectable payment indicator to the user, wherein selection of the selectable payment indicator is configured to establish a communications link with a payment entity, in order to transmit a request

Art Unit: 3692

from the user to the payment entity to pay the revised amount of the available bill (column 10, line 40-column 11, line 42).

Claim 52 is written in means that parallel the limitations found in claim 51 above, therefore, is rejected by the same rationale.

Allowable Subject Matter

8. Claims 29-47 are allowed over the prior arts of cited record.

Conclusion

9. Claims 48-52 are rejected.

Claims 29-47 are allowed.
